

**RITA
PAD
Printing-Systems**

Welcome to the world of Rita Pad printing systems where international technology combines with engineering brilliance to give the cutting edge to Pad printing technology.

Hi tech automatic, semi automatic, standard systems to print on any surface or shape, from single to eight colours of high speed precision printing. Technology that has rendered obsolete all other printing methods in it's area of operation.

The MLM range of four colour machines enable high quality four colour printing at speeds of up to 1000 strokes/hr.

The system uses Microprocessor based control panel along with four digit digital counter allowing flexibility on machine programming and reliability.

Locking stations are used to provide clear and precise registration.

Machines can be coupled to an oval indexing , linear conveyor or shuttle system to provide high speed trouble free prints.

MLM 100F GF+OVAL INDEXING

MLM 100T+SHUTTLE

APPLICATIONS

- Electronics
- Hand Tools
- Engineering goods
- Rubber Industry
- Auto
- Toys
- Plastics
- Novelty Items
- Consumer goods
- & MANY OTHERS

DON'T JUST PAD PRINT IT, RITA PAD PRINT IT
