

# THE COMPLETE SOLUTION FROM RITA PAD

## PADS

Precision engineered pads with custom built options, a range of hardness and different modular designs to suit every printing need.

Specially developed raw materials ensure low cost per use and millions of high quality impressions.

Rita pad's silicone printing pads have high mechanical and chemical resistances for longer life, with antistatic properties and best contact angle for high quality printing.

Our pads set quality standards in the industry with over 100 designs.

## INKS

Rita Pad offers inks for all applications, Wiederhold Germany, Morlock, ultraviolet, screen printing, non toxic, glass inks, rubber inks, high opaque inks, supported with complete range of thinners, hardeners, anti bubbling agents, additives etc.

## CLICHE PLATES

Highly specialised cliché plates produced using state of the art hi-tech equipment.

Precision engineering, with precisely controlled depth varying as per material to be printed.

Surface finished to produce finest detail of the most intricate quarter tone designs.

Specially selected material subjected to stringent heat treatment to produce long lasting clichés for millions of print cycles.

Wide range of cliché sizes including thin clichés with magnetic holders thick steel clichés and photo polymer nylo plates.
